Subject: Notice of Changes to Specific IgE Allergen Reporting

Regional Medical Lab is pleased to announce that we will be **expanding** our reportable range for all ThermoFisher Scientific ImmunoCAP Specific IgE allergens. The current reportable lower limit for specific IgE allergens is 0.35 kUA/l. The new lower reportable limit will be 0.10 kUA/l. Anything resulting between 0.10 and 0.34 kUa/L will be **assigned a 0/1 class and** reported as **equivocal**. This change will allow us to provide future testing for sensitization to certain allergen components such as peanut, egg and milk.

If you have any questions regarding this communication, please contact Dr. Gerald Miller at 918-744-2553, Sonya Bruening or Kevin Wamego at 918-744-2500 .
